

IBM Power Solutions

“65% of IT decision-makers agree that their organization is defaulting to cloud-based services when upgrading or purchasing new technical capabilities.”

Foundry, Cloud Computing Study 2023

For many companies, the IBM Power platform has long been the cornerstone of a strong IT infrastructure upon which business critical applications run. As reliable as this platform is, managing and maintaining it can create some significant challenges. With a shrinking population of IBM Power experts, and the struggles related to implementing reliable backup and disaster recovery strategies, companies are looking for outside help. Racksquared Data Centers has a full suite of IBM Power solutions designed to let you focus on your core business.

“Our own transition was painless. When we were done, we redirected people to the new server, and the only thing that changed from their perspective was a system name. I was able to call my customers and verify and check in to find that everything worked.” Tony Baldwin, SC Codeworks

Racksquared's Solutions for your Business

IBM Power in the Cloud

Get out of the hardware procurement and management business as Racksquared offers IBM Power cloud hosting solutions for IBM i, AIX, and Linux where you only pay for the resources you use.

IBM Power Disaster Recovery

The ability to recover quickly and efficiently is vital when your business runs on IBM Power. Racksquared offers affordable IBM Power disaster recovery solutions designed to get your business back up and running.

IBM Power Cloud Backup

Be confident in your backup strategy and know your data is safe and secure. Racksquared has IBM Power cloud backup solutions that give you 3 copies of your data, on 2 different media, and 1 stored offsite.

IBM Power Colocation

No longer worry about the environment your IBM Power server is housed in. Racksquared offers IBM Power colocation providing you with a secure, reliable, and resilient data center environment with 24/7/365 monitoring.

Why Racksquared?

Our team is focused on keeping your IBM Power systems up and running and we do this by providing you with access to technical expertise, the latest technologies, and a secure, reliable, and resilient environment.

Expertise

Racksquared's IBM i subject matter experts have over 25 years of experience managing and supporting this platform. This team manages, monitors, and supports our infrastructure around the clock.

Technology

Racksquared's IBM i cloud leverages the latest IBM hardware (Power9/Power10) and software. It is updated consistently with the latest versions, so the environment always operates at its best.

Environment

Racksquared's infrastructure is designed to be secure, reliable, and resilient so you can always get to your IBM i systems. When the unexpected happens, we are always ready and prepared.
